

I am writing in response to the LPFM that is being considered to replace the currently running FM service. I listen to K-Love radio that is on a FM translator, if the service is downgraded to LPFM I may not get the K-Love broadcast. Being able to receive K-Love has been a great encouragement in my day and a balancer when things get rough it provides encouragement to my day, no other radio station around is able to encourage me the way the music that K-Love does. The music reaches people in my community and offers a positive alternative to more secular music. I believe since K-Love radio has so many translator stations and based on the testimonies that come through the radio it is also having a positive effect on others. I do not want LPFM because it may not allow me to tune in to K-love.
